

# MAMIYA 645 AFD

The ergonomically designed Mamiya 645AFD combines the exceptional image detail of 6 x 4.5cm format with 35mm ease of use.

Whether shooting portraits or landscapes the Mamiya 645AFD handles just like a 35mm SLR with a well-balanced and natural feel, even when held in one hand. The die-cast casing is made from lightweight, high-strength aluminium alloy, ensuring a reliable, durable performance even under the harshest working conditions.

Designed to perform in all situations the Mamiya 645AFD is the only medium format camera to feature an infrared auto-focus beam which activates automatically under low light conditions. With 10 digitally advanced World-Class AF lenses, including 2 zooms, a new dimension of precision and control has been added to the exposure process.

A digital data communication system displays all mode, setting and status details on the viewfinder, body and film back, and the conveniently located front and rear digital dials enable fast, easy adjustments to be made during shooting.

Bridging the gap between conventional and digital photography the 645AFD offers exclusive data transfer to a digital back via MSC (Mamiya Serial Communication) Intelligence. Utilizing the same camera body for film and digital capture means the Mamiya 645AFD offers greater flexibility for any photographic application making it the camera of choice for today's contemporary photographers.
